Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/823,276

Applicant(s)

INOUE ET AL.

Examiner

Aimee J Li

Art Unit

2183

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 December 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-21 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

1. Claims 1-21 have been considered. Claims 1, 2, 6, 7, 12, 15, and 19 have been amended as per Applicant's request.

Papers Submitted

2. It is hereby acknowledged that the following papers have been received and placed of record in the file: RCE as filed 27 December 2004, Amendment as filed 27 December 2004, and Two Month Extension of Time as filed on 27 December 2004.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being taught by Witt et al., U.S. Patent Number 6,018,798 (herein referred to as Witt).

5. Referring to claim 1, Witt has taught a method comprising in a processor which has a future file (Witt column 12, line 44; column 12, line 66 to column 13, line 7; and Figure 3) and which is capable of restoring the future file in a single clock cycle (Witt column 13, lines 40-46 and column 18, lines 54-67), restoring the future file over more than one clock cycle when a termination occurs in the processor (Witt column 19, lines 20-49).

6. Referring to claim 2, Witt has taught wherein the processor is a pipelined processor (Witt column 1, lines 15-20; column 5, lines 47-52; column 13, lines 23-27; column 22, lines 1-3; Figure 1; Figure 3; and Figure 13).

Art Unit: 2183

7. Referring to claim 3, Witt has taught wherein restoring the future file comprises updating at least some speculative registers in the future file with architectural values (Witt column 13, lines 23-33).

8. Referring to claim 4, Witt has taught wherein more than one clock cycle comprises two clock cycles (Witt column 19, lines 20-49).

9. Referring to claim 5, Witt has taught wherein more than one clock cycle comprises three clock cycles (Witt column 19, lines 20-49).

10. Referring to claim 6, Witt has taught wherein the processor is a pipelined processor (Witt column 1, lines 15-20; column 5, lines 47-52; column 13, lines 23-27; column 22, lines 1-3; Figure 1; Figure 3; and Figure 13) and more than one clock cycle comprises a number of clock cycles required to flush the processor (Witt column 13, lines 40-46 and column 19, lines 20-49).

11. Referring to claim 7, Witt has taught an apparatus comprising

- a. A control unit coupled to a first set of registers, a second set of registers and a pipeline (Witt column 12, lines 45-65 and Figure 3),
- b. The control unit adapted to restore the first set of registers with data contained in the second set of registers over more than one clock cycle following a termination of an instruction in the pipeline (Witt column 13, lines 40-46 and column 19, lines 20-49) although the control unit has the capability of restoring the first set of registers with data contained in the second set of registers in one clock cycle (Witt column 18, lines 54-67).

Art Unit: 2183

12. Referring to claim 8, Witt has taught wherein each register in the second set of registers is associated respectively with a register in the first set of registers (Witt column 12, line 66 to column 13, line 7).

13. Referring to claim 15, Witt has taught a system comprising:

- a. A static random access memory device (Witt column 5, lines 53-55 and Figure 1).

In regards to Witt, the static random access memory (SRAM) device is inherent to the instruction cache. Cache memory, like the instruction cache in Witt, are SRAMs (InstantWeb “static random access memory” ©1995)

- b. A processor coupled to the static random access memory device (Witt column 5, lines 53-55 and Figure 1),
- c. Wherein the processor includes a first set of registers, a second set of registers and a pipeline (Witt column 12, lines 45-65 and Figure 3),
- d. A control unit adapted to restore the first set of registers with data contained in the second set of registers over more than one clock cycle following a termination of an instruction in the pipeline (Witt column 13, lines 40-46 and column 19, lines 20-49) although the control unit has the capability of restoring the first set of registers with data contained in the second set of registers in one clock cycle (Witt column 18, lines 54-67).

14. Referring to claims 9 and 16, Witt has taught wherein more than one clock cycle comprises two clock cycles (Witt column 19, lines 20-49).

15. Referring to claims 10 and 17, Witt has taught wherein more than one clock cycle comprises three clock cycles (Witt column 19, lines 20-49).

Art Unit: 2183

16. Referring to claims 11 and 18, Witt has taught wherein the control unit is further adapted to flush the pipeline following the termination of the instruction in the pipeline (Witt column 13, lines 40-46 and column 19, lines 20-49).

17. Referring to claims 12 and 19, Witt has taught wherein more than one clock cycle comprises the number of clock cycles required by the processor to flush the pipeline (Witt column 13, lines 40-46 and column 19, lines 20-49).

18. Referring to claims 13 and 20, Witt has taught the control unit further adapted to restore at least one register in the first set of registers after the pipeline has been flushed (Witt column 13, lines 40-46 and column 19, lines 20-49).

19. Referring to claims 14 and 21, Witt has taught wherein the pipeline is an X-stage pipeline (Witt column 1, lines 15-20; column 5, lines 47-52; column 13, lines 23-27; column 22, lines 1-3; Figure 1; Figure 3; and Figure 13), the control unit adapted to restore the first set of registers with data contained in the second set of registers over X-N clock cycles or fewer, following a termination of an instruction in an Nth stage of the pipeline (Witt column 19, lines 20-49 and column 22, lines 56-67).

Response to Arguments

20. Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

21. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure as follows. Applicant is reminded that in amending in response to a rejection of claims, the patentable novelty must be clearly shown in view of the state of the art disclosed by

Art Unit: 2183

the references cited and the objections made. Applicant must also show how the amendments avoid such references and objections. See 37 CFR § 1.111(c).

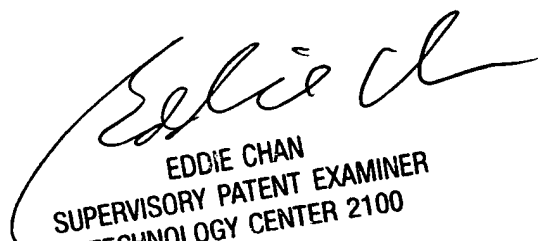

- a. Witt et al., U.S. Patent Number 6,112,296, has taught restoring a future file.
- b. Tran et al., U.S. Patent Number 6,205,541, has taught restoring a future file.
- c. Talcott et al., U.S. Patent Number 6,615,343, has taught restoring a future file.

22. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aimee J Li whose telephone number is (571) 272-4169. The examiner can normally be reached on M-T 7:30am-5:00pm.

23. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie Chan can be reached on (571) 272-4162. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

24. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
